

# Supporting the circular economy: illustrations from the EU SWITCH programmes

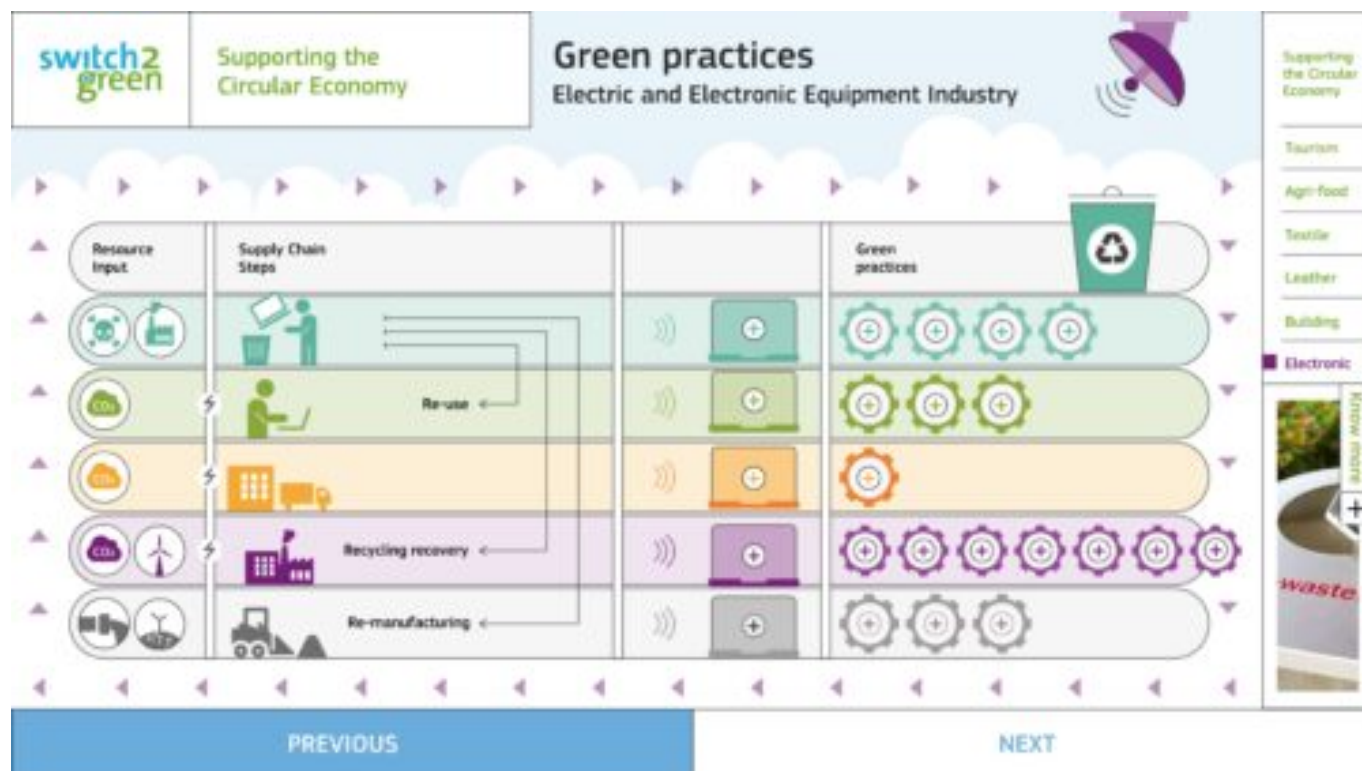

The new DG INTPA publication “Supporting the Circular Economy” gathers practices from the EU SWITCH programmes. It takes us to a journey across selected economic sectors, with a view to inspiring and encouraging a switch to green, notably circular, practices. Facts and figures on the environmental impact of economic activities are used to explain the challenges faced in each sector. Infographics and animated illustrations complement stories, each showcasing successful SWITCH projects with strong replication potential.

For different sectors the publication pinpoints to challenge...

but also highlights the entry points how green, notably circular approaches can address the challenges and facilitate solutions.

To discover the whole story, download the brochure [Supporting the Circular Economy](#) or view online [here](#).
