

# Join us online - still time to register for Online Participation at the EDD!

The European Development Days bring together the development community, sparking new collaborations and initiatives that address the world's most pressing challenges.

This year, the event will feature five different themes, all part of the EU's Global Gateway strategy: climate & energy, digital, transport, health and education & research.

The EDDs have an impressive line-up of expertise from all over the world, participating in more than 90 sessions across the programme.
